Sarah B. Mangelsdorf concentrates her practice in environmental and administrative law. For several years, Sarah has provided legal counsel to numerous governmental agencies on a variety of matters pertaining to environmental law and policy, administrative law, energy efficiency, and hazardous substances in the workplace. As an Assistant Attorney General in the Agriculture and Environmental Division, Sarah has litigated cases involving various Missouri environmental laws and regulations, including:

- Missouri Clean Water Law
- Missouri Air Conservation Law
- Missouri Hazardous Waste Management Law, and
- Missouri Solid Waste Management Law.

Many of these cases also required a working knowledge of the Missouri Merchandising Practices Act, the Missouri Administrative Procedures Act, bankruptcy laws, and various federal environmental laws, including the Resource Conservation and Recovery Act and the Comprehensive Environmental Response, Compensation, and Liability Act.

Representative Experience:

- Handled all aspects of litigation in environmental cases, including drafting pleadings, motion practice, discovery, settlement negotiations, and trial.
- Defended clients before the Administrative Hearing Commission on environmental permit appeals and professional license suspensions.
- Appeared before the Public Service Commission on energy efficiency matters in rate cases involving electric and natural gas utilities.
- Assisted the Missouri Department of Natural Resources' counsel and staff with interpreting environmental statutes and regulations, drafting and implementing internal policies and procedures, reviewing legislative and rule-making proposals, Sunshine Law compliance, negotiating permit terms, conditions and variance requests, and interfacing with the EPA, the regulated community, stakeholders, and the Department's boards and commissions.
